**Over 40 years experience in planning, law, and fair housing**

**Attorney/Planning Consultant. Planning/Communications {1979+} and the Law Office of Daniel Lauber {Nov. 1985+}**

- We help cities and counties bring their zoning provisions for community residences for people with disabilities (group homes, sober homes, small halfway houses) and recovery communities into compliance with the nation's Fair Housing Act and applicable state statutes that comply with the Fair Housing Act. Before drafting zoning amendments, we conduct a thorough report that provides the planning rationale that enables the client jurisdiction to legally require a spacing distance and licensing and/or certification for community residences and recovery communities. We also write licensing ordinances for community residences for which the state does not have a licensing requirement such as sober living homes, recovery residences, and recovery communities.
  - We provide consulting services to municipalities, counties, and states on planning, zoning, housing, and fair housing matters.
  - We provide other planning and legal services as needed including developing land-use regulations and comprehensive plans for municipalities; site selection; developing affordable housing policy and programs; and public relations and communications. Activities include legal representation, expert testimony, report and plan preparation.
  - We conduct Analyses of Impediments to Fair Housing Choice and Assessments of Fair Housing, and prepare Fair Housing Action Plans for cities, counties, consortiums, and states that receive CDBG funds as required by the U.S. Department of Housing and Urban Development. These analyses include an evaluation of the jurisdiction's zoning provisions for community residences for people with disabilities.
  - We conduct studies of housing needs and provide expertise on techniques to preserve existing affordable housing and generate new affordable housing.
  - We design and conduct random sample surveys of citizens and other populations using sound, scientific methods that produce accurate, representative results.
  - We turn local government studies, plans, and zoning codes into clear, understandable, and visually pleasing documents that a lay person can understand.

#### Analyses of Impediments to Fair Housing Choice (AI)

Each analysis of impediments analyzed and reported on the client jurisdiction’s housing; land use regulations including zoning for community residences for people with disabilities; demographics; income; actual extent of integration; real estate practices; mortgage lending; housing affordability; relationship between public transportation, employment, and housing; and other factors that affect fair housing choice. The extent of integration is estimated fairly through a “Free Market Analysis” that takes into account actual household income and the actual cost of housing to approximate the proportions of each race and Hispanics of any race that would be expected to live in the jurisdiction and each census tract in a free housing market *not* distorted by housing discrimination.
